

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. the 1990s, the incidence of *S. flexneri* has increased in the United Kingdom [10]. In the United States, *S. flexneri* has been reported to be the most common serotype of *S. flexneri* isolated from children with acute bacterial dysentery [11].

There is a paucity of data on the epidemiology of *S. flexneri* in the United Kingdom. The only published study of *S. flexneri* in the United Kingdom was by Roberts *et al.* [12], who reported the results of a study of *S. flexneri* isolates from patients with acute bacterial dysentery in the United Kingdom between 1988 and 1992.

The purpose of this study was to determine the epidemiology of *S. flexneri* in the United Kingdom between 1995 and 1999. We determined the serotypes of *S. flexneri* isolated from patients with acute bacterial dysentery in the United Kingdom, and we determined the prevalence of *S. flexneri* in the faecal flora of healthy children in the United Kingdom.

MATERIALS AND METHODS

Study sites

Patients with acute bacterial dysentery were recruited from 10 general practices in the United Kingdom. The 10 general practices were selected to represent a range of geographical locations and patient populations. The 10 general practices were located in 5 different regions of the United Kingdom: 2 in the north, 3 in the south, 2 in the east and 3 in the west.

PREFATORY NOTE

The accompanying list is designed primarily to serve as the basis of observations by the instructor and as a guide to the students in English 150 (Bibliography and Methods of English Literary History) in the Graduate School of the University of Chicago. It is hoped, however, that the material may prove useful to other investigators who, bewildered by a seeming multiplicity or nonplussed by an apparent absence of sources, labor under the delusion that the collection of bibliography is largely a matter of luck and that consequently it makes little difference where they begin. Special attention is therefore called to the Universal Bibliographies (section III), the Bibliographies of Bibliographies (section IV), the indexes and classified lists of books and articles (sections V-VI), and the bibliographies of dissertations (section IX). Students are urged to exhaust these general sources of information before following the desultory method frequently adopted even by otherwise respectable scholars.¹ They are reminded that the most efficient investigator, by acquainting himself at the outset with previous collections of material on his subject, avoids the necessity of repeating operations already performed by others, and spares himself the possible mortification of discovering at length by accident that the matter under discussion has already been adequately treated and that therefore his labor has been in vain.

In order to avoid confusing the beginner by a multitude of references, the compiler has included only a few of the most useful or comprehensive sources. Although the choice has generally been restricted to books and articles which are strictly bibliographical or contain bibliographical features and which deal with English literature, a number of works not usually included in bibliographies of English literature have been introduced because they furnish information on subjects which are allied to English and which sometimes demand the attention of the literary investigator at a time when he has little bibliographical information outside his special territory. It should be added, however, that the lists of special bibliographies and treatises given in sections XI, XIII, and XIV are not intended to dispense with the consultation of the general repertories enumerated in sections III-VI and IX. For the sake of convenience the literature of America has been classified separately. The list is followed by an index of the most important entries.

¹ "Sans doute, on arrive peu à peu, de soi-même, à s'initier au maniement des principaux répertoires, . . . mais ce n'est jamais sans tâtonnements ni sans déboires, et il est rare que la science, acquise ainsi de pièces et de morceaux, soit intégrale" (Charles-V. Langlois, *Manuel de bibliographie historique* [2. éd., Paris, 1901], I, viii f.).

INDEX	52

The study of bibliography and of the scientific methods of using books should have an assured place in the university curriculum, . . . and . . . all who go forth into the world as graduates should have such an intelligent and practical knowledge of books as will aid them in their studies through life. . . . I do not mean that the university student should learn the contents of the most useful books; but I do mean that he should know of their existence, what they treat of, and what they will do for him. He should know what are the most important reference books. . . . If a question arises as to the existence, authorship, or subject of a book, an educated man should know the catalogues or bibliographies by which he can readily clear up the doubt. The words Watt, . . . Graesse, Quérard, Hoefer, Kayser, Hinrichs, . . . Hain, and Vapereau should not be unmeaning sounds to him. He should know the standard writers on a large variety of subjects. He should be familiar with the best method by which the original investigation of any topic may be carried on. . . . No person has any claim to be a scholar until he can conduct such an original investigation with ease and pleasure.
—WILLIAM FREDERICK POOLE (1821-94)

I think, sir, . . . you will find it a very good practice *always to verify your references*.—MARTIN JOSEPH ROUTH (1755-1854)

This is my chief word of advice to every teacher. If you wish to make a text your own, if you wish to have any sort of right to give any opinions with regard to it, the least you can do is to verify your references. . . . I can assure you that this is the easiest and best way of learning to be a scholar, and therefore of qualifying yourself for being a teacher. But I have a special reason, even beyond this, for giving this advice. For it is the way to gain a true interest in the subject you are teaching; . . . and it is the way to open your eyes. Scholarship . . . is a question of having eyes or having no eyes. If you have no eyes, you will not make much of . . . scholarship. Moreover, the particular eyesight of which I am now speaking is a thing that can be acquired; and it can be acquired and trained, at any rate to an elementary extent, by the simple process of looking to see, when a reference is given you, whether the thing which is asserted is really so.

. . . . To one who has never yet tried it, such advice seems to be the stupidest and the dullest imaginable; and perhaps the most useless. But the man who has tried it soon learns to know better. For the results are often so wholly surprising, so novel, so sensational, that anyone who honestly tries to follow up to their sources only a few items of information will soon be caught by the excitement of it, and will soon learn to do by choice and out of pure pleasure what he began to do out of duty or curiosity.
—WALTER WILLIAM SKEAT (1835-1912)

EXPLANATIONS

A dash (—) after an entry indicates that the publication in question is in progress.

A dash (——) before an entry indicates that the author or the title is the same as in the preceding entry.

Two dashes (—— —) before an entry indicate that the author and the title are the same as in the preceding entry.

Arabic numerals in boldface type refer to the serial numbers in the bibliography.
